

PHASE 6

Project Testing

Import Data using Transform Maps (Spreadsheet) — ServiceNow Micro Project

This document is a separate phase report prepared from the supplied original project document. The wording is expanded for clarity while retaining the original project terminology, configurations, steps, and documented results.

Phase Summary

Tests Coalesce, modified employee data, repeated imports, and Transform History results using the documented insert/update/ignore outcomes.

6.1 Coalesce Configuration

The original project explains that employee data may be imported more than once. To prevent duplicate records, Coalesce is enabled in the Transform Map field mapping. The documented test uses the Employee ID field so that an incoming row can be matched to an existing employee record.

6.2 Steps for Enabling Coalesce

Open the Transform Map under the relevant ServiceNow navigation, open Sample Spreadsheet Import, go to the Field Maps related list, and change the required field's Coalesce value from False to True. Save the form before performing the next import.

6.3 Modified Spreadsheet Test

The source document records a four-row test. Two rows represent existing employee IDs with changed Name or Email values, while two rows contain new employee IDs. The modified spreadsheet is loaded through the existing Employee Import table and transformed using the same Transform Map.

6.4 Observed Results

The original test reports four uploaded rows: two were inserted because they were new IDs, and two were updated because their existing IDs matched records already in the target table. This demonstrates the intended distinction between new records and existing records.

6.5 Repeated Upload Test

The same four-row spreadsheet is uploaded again using the same Transform Map. The source document records zero inserted rows, zero updated rows, and four ignored rows. This demonstrates the behavior observed when the same data is processed again after the first successful import.

6.6 Validation Method

Transform History is used to inspect the result of each transformation. The Employee Test table is then opened to confirm that updated and newly inserted records appear as expected. Together, these checks provide both process-level and data-level validation.

6.7 Testing Conclusion

The testing phase verifies the duplicate-handling enhancement using documented insert, update, and ignored outcomes. It also shows why a stable matching field such as Employee ID is important when repeated spreadsheet data is processed.

Configuration / Planning Reference

Test case	Rows	Observed result
Modified spreadsheet	4	2 inserted + 2 updated
Same spreadsheet repeated	4	0 inserted + 0 updated + 4 ignored
Validation	Transform History	Insert/update/ignore status reviewed

Original Screenshot Evidence

The following pages reproduce the relevant screenshot/evidence pages from the original supplied project document. They are included without replacing the original visual evidence, so the configuration and results can be checked directly.

Employee ID	Employee Name	Email	Department	Location
SB-0003	Meghana Katoju	test3@gmail.com	ServiceNow	Hyderabad
SB-0001	Ratan Kumar	test1@gmail.com	ServiceNow	Hyderabad
SB-0015	Srinu Nandipalli	test15@gmail.com	ServiceNow	Hyderabad
SB-0011	Abhishek S	test11@gmail.com	Salesforce	Hyderabad

SB-0004	Ajay Kumar	test4@gmail.com	ServiceNow	Hyderabad
SB-0012	Rakesh Bhoomani	test12@gmail.com	Salesforce	Hyderabad

Phase 6: Enable Coalesce to Avoid Duplicate Records

- In real projects, the same employee data may be imported multiple times.
- To prevent duplicate employee records, we use **Coalesce**.
- The Coalesce will update the same records with new values if we add and the duplicate values are not inserted.

Steps:

1. Open Transform map Under System LDAP On All menus.
2. Open the Created Transform map , Name is Sample Spreadsheet Import.
3. Under Related list, select the Field maps Section and Make any one field Coalesce True which appears in False.
4. Now save the form.
5. Then again add some data which is in Excel format.

Source field	Target field	Coalesce
u_name	u_employee_name	false
u_employee_id	u_employee_id	true
u_department	u_department	false
u_location	u_location	false
u_email	u_email	false

1 to 5 of 5

PHASE 7 : Inserting New Data In Excel Format

Steps :

- Navigate to All menus.
- Search for Load data Under System Import set Open Load Data.
- Fill the details as
- Import set table as select Existing table {Employee Import}.
- Source of Import is Select File and choose the file from Files.
- Sheet number : 1, Header row : 1.
- Now Click submit.

Evidence reproduced from the original project document — source page 12.

Original source page 13

Load Data

Import set table

☐ Create table

☒ Existing table

Import set table: Employee Import [u_employee_import]

Source of the import

☒ File

☐ Data source

File: Choose File spreadsheetproject.xlsx

Sheet number: 1

Header row: 1

Submit

- Newly Created Excel Data is this.

Employee ID	Name	Email	Department	Location
SB-0001	Ratan Kumar	test1@gmail.com	ServiceNow	Hyderabad
SB-0002	Sandeep Guja	test2@gmail.com	ServiceNow	Hyderabad
SB-0003	Meghana Katoju	test3@gmail.com	ServiceNow	Hyderabad
SB-0004	Ajay Kumar	test4@gmail.com	ServiceNow	Hyderabad
SB-0005	Bitla Sai Prasad	test5@gmail.com	ServiceNow	Hyderabad
SB-0006	Sushma Ganji	test6@gmail.com	ServiceNow	Hyderabad
SB-0007	Yaswanth Nikku	test7@gmail.com	ServiceNow	Hyderabad
SB-0008	Prashanth Reddy	test8@gmail.com	ServiceNow	Hyderabad
SB-0009	Praneeth S	test9@gmail.com	ServiceNow	Hyderabad
SB-0010	Ravi Teja	test10@gmail.com	ServiceNow	Hyderabad
SB-0011	Abhishek S	test11@gmail.com	Salesforce	Hyderabad
SB-0012	Rakesh Bhoomani	test12@gmail.com	Salesforce	Hyderabad
SB-0013	Mounika K	test13@gmail.com	Salesforce	Hyderabad
SB-0014	Sushanth J	test14@gmail.com	Salesforce	Hyderabad
SB-0015	Srinu Nandipalli	test15@gmail.com	ServiceNow	Hyderabad

- It is the previously added data.
- Now, In this new data we added 4 rows of the 2 rows with the same existing data with different Name changed and Email changed.
- That Raviteja Employee Email was Changed to [\[test10@gmail.com\]](mailto:test10@gmail.com) → test18@gmail.com].
- And Employee ID with SB-0004 name was changed to [Ajay kumar → Ajay].
- And two other new Employee ID's are added.
- Now after submitting the form it appears as State Completed and Success.

Evidence reproduced from the original project document — source page 13.

- Now Click the Run transform Under the next steps.
- Then it opens Specify Import set and transform map which is previously selected transform map then Click Transform button.

Evidence reproduced from the original project document — source page 14.

- Now the State is completed and Success.
- Now again click on the Transform history then it shows the newly added data and its status of Inserted and Skipped values out the given data.

Started	State	Completed	Run time	Set	Import set table	Total	Inserts	Updates	Ignored	Skipped	Errors	Transform Map
2026-01-29 03:47:37	Complete	2026-01-29 03:47:38	1 Second	ISET0010003	Employee Import [u_employee_import]	4	2	2	0	0	0	Sample Spreadsheet Import

Evidence reproduced from the original project document — source page 15.

Original source page 16

- From the above figure : total 4 rows are uploaded out of 2 are Inserted that are two new ID's.
- And 2 rows are updates that are Same ID's with different Name and different Email that we changed.
- Then Open the Employee Tests table and see the rows updated and inserted.

Employee ID	Employee Name	Email	Department	Location
SB-0001	Ratan Kumar	test1@gmail.com	ServiceNow	Hyderabad
SB-0002	Sandeep Guja	test2@gmail.com	ServiceNow	Hyderabad
SB-0003	Meghana Katoju	test3@gmail.com	ServiceNow	Hyderabad
SB-0004	Ajay	test4@gmail.com	ServiceNow	Hyderabad
SB-0005	Bitla Sai Prasad	test5@gmail.com	ServiceNow	Hyderabad
SB-0006	Sushma Ganji	test6@gmail.com	ServiceNow	Hyderabad
SB-0007	Yaswanth Nikku	test7@gmail.com	ServiceNow	Hyderabad
SB-0008	Prashanth Reddy	test8@gmail.com	ServiceNow	Hyderabad
SB-0009	Praneeth S	test9@gmail.com	ServiceNow	Hyderabad
SB-0010	Raviteja	test10@gmail.com	ServiceNow	Hyderabad
SB-0011	Abhishek S	test11@gmail.com	Salesforce	Hyderabad
SB-0012	Rakesh Bhoomani	test12@gmail.com	Salesforce	Hyderabad
SB-0013	Mounika K	test13@gmail.com	Salesforce	Hyderabad
SB-0014	Sushanth J	test14@gmail.com	Salesforce	Hyderabad
SB-0015	Srinu Nandipalli	test15@gmail.com	ServiceNow	Hyderabad
SB-0016	Siri	test16@gmail.com	Aiml	Chennai
SB-0017	Naga sai	test17@gmail.com	Aiml	Hyderabad

- Now Repeat the Phase 7 with the same steps and same Excel sheet and Submit to check how many rows are updated and Inserted with the same data.
- Then Open the Transform history to check.

Started	State	Completed	Run time	Set	Import set table	Total	Inserts	Updates	Ignored	Skipped	Errors	Transform Map
2026-01-29 05:39:36	Complete	2026-01-29 05:39:36	0 Seconds	ISET0010004	Employee Import [u_employee_import]	4	0	0	4	0	0	Sample Spreadsheet Import

- Here we can see the total 4 are uploaded.
- On that 0 rows are Inserted and updates 0 and Ignored 4 rows.
- That same sheet we uploaded to the same transform map we created.
