

# PHASE 7

## Project Documentation & Reporting

Import Data using Transform Maps (Spreadsheet) — ServiceNow Micro Project

This document is a separate phase report prepared from the supplied original project document. The wording is expanded for clarity while retaining the original project terminology, configurations, steps, and documented results.

### Phase Summary

Documents and configures the three employee reports and preserves the original report screenshots as evidence.

#### 7.1 Documentation Purpose

This phase records the reporting portion of the project and organizes evidence of the implemented employee data workflow. The source project creates three reports from the Employee Test table so that employee information can be viewed by department, by location, and as a detailed list.

#### 7.2 Report 1 – Employees by Department

A new report named Employees by Department is created using Employee Test as the table. The report type is Pie chart. Department is selected as the Group by field and Count is used as the aggregation. This configuration provides a visual distribution of employee records across departments.

#### 7.3 Report 2 – Employees by Location

A second report named Employees by Location is created using Employee Test. The source document specifies a Bar Chart, Count aggregation, and Location as the Group By field. The report is run and saved after the configuration is completed.

#### 7.4 Report 3 – Employee List Report

The Employee List Report is configured as a List report using Employee Test. The selected columns are Employee ID, Employee Name, Email, Department, and Location. No additional Style configuration is required before running and saving the report.

#### 7.5 Reporting Value

The three reports present the same underlying Employee Test data in different forms. The department chart provides grouped distribution, the location chart provides geographic grouping, and the list report provides record-level detail. Together they provide a compact reporting layer for the imported employee data.

#### 7.6 Documentation Evidence

The screenshots included after this section are taken from the original project document and preserve the original reporting configuration and result screens. They provide visual evidence for the report creation steps described above.

## Configuration / Planning Reference

| Report                  | Type      | Group By   | Aggregation / Columns                          |
|-------------------------|-----------|------------|------------------------------------------------|
| Employees by Department | Pie Chart | Department | Count                                          |
| Employees by Location   | Bar Chart | Location   | Count                                          |
| Employee List Report    | List      | —          | Employee ID, Name, Email, Department, Location |

## Original Screenshot Evidence

The following pages reproduce the relevant screenshot/evidence pages from the original supplied project document. They are included without replacing the original visual evidence, so the configuration and results can be checked directly.

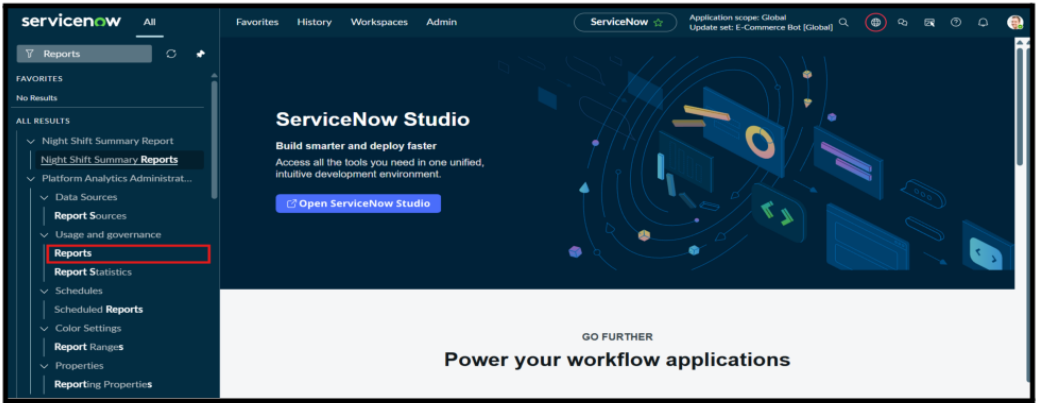

## PHASE 8 : Create Reports on Employee Test Table

### Navigation Steps :

- Open All menus, Search for **Reports**.
- Under **Usage and governance** Select Reports.
- Click the **New** button to create a new report.
- Create **3 Reports** as follows.

### Report 1: Employees by Department

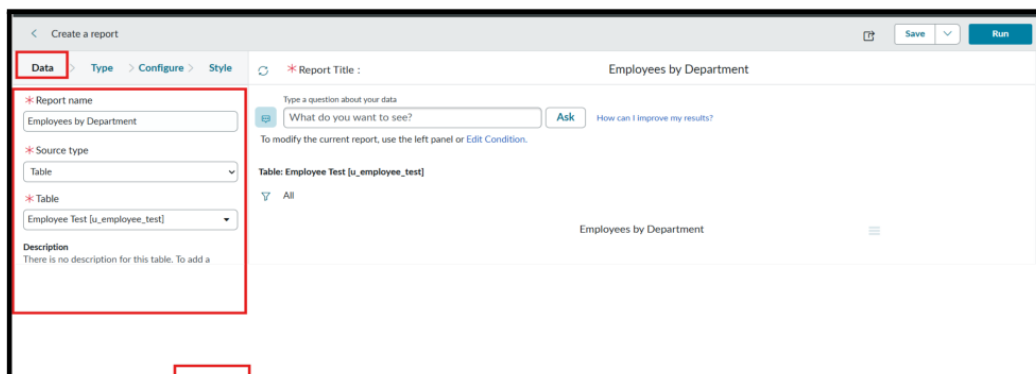

- In Data
- Report name : **Employees by Department**.
- Source Type : **Table**.
- Table : **Employee Test**, Now click the Next button.

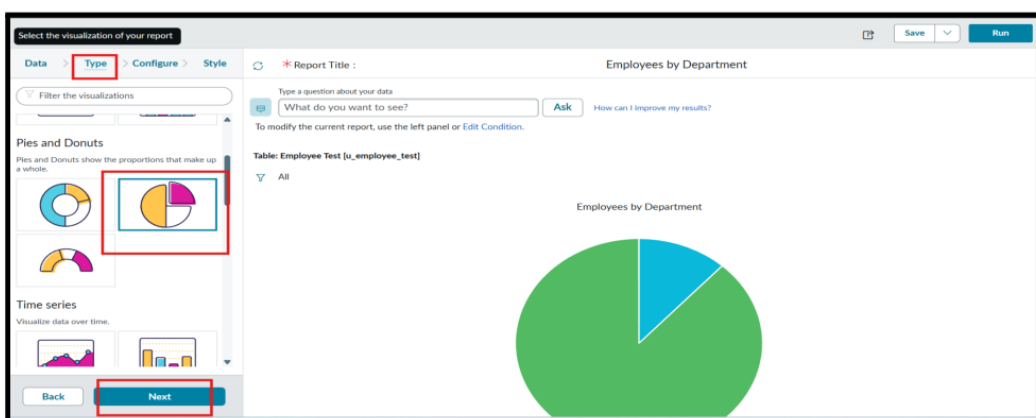

| Reports   Updated                       |                                               |      |                     |            |                     |  |
|-----------------------------------------|-----------------------------------------------|------|---------------------|------------|---------------------|--|

Evidence reproduced from the original project document — source page 17.

## Original source page 18

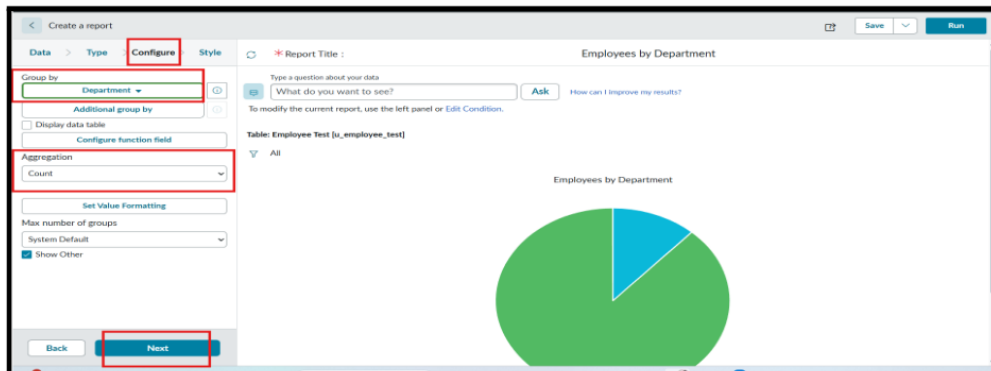

- Now after Clicking next in type Select **Pie chart**.
- And click the **next** button.

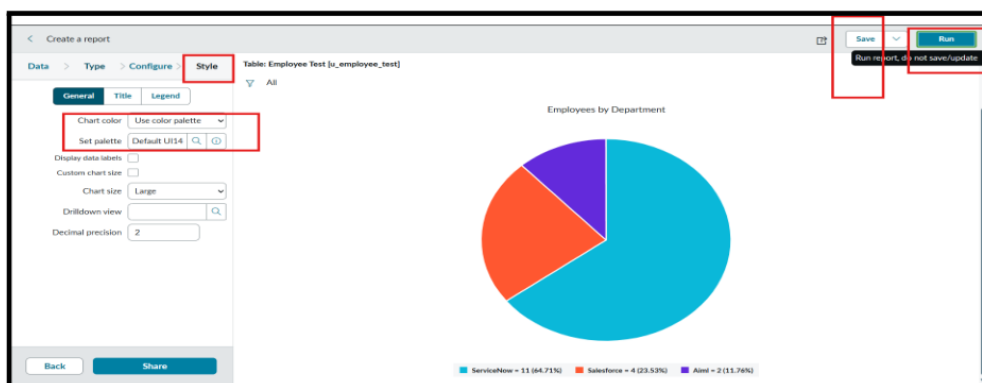

- Now In Configure Select Group by **Department** Field.
- In the Aggregation Field Select **Count**.
- Then Click **next**.

Evidence reproduced from the original project document — source page 18.

- Now In Style Leave the Chart color by **default**.
- And Click the **Run** button to Execute the given data Report.
- And Click **save** button to Save the Report.

## Report 2: Employees by Location

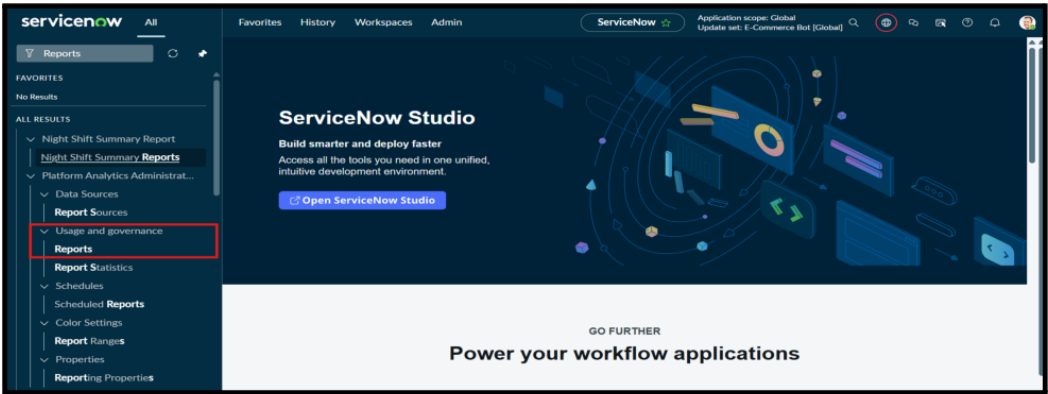

### Configuration

- Table: Employee Test
- Type: **Bar Chart**
- Aggregation: **Count**
- Group By: **Location**

Evidence reproduced from the original project document — source page 19.

Steps :

- 1. Create a New Report.
- 2. Report name : **Employees by Location.**
- 3. Table Select : **Employee Test.**
- 4. Select Type : **Bar Chart.**
- 5. In Configure Select Group by Field : **Location.**
- 6. And Aggregation is **Count.**
- 7. Now Click **Run** to Execute the Report and Click the **Save** to save the Report.
